Bernard R. Cavazos, Jr., M.D.

Carolyn L. Cavazos, M.D.

9639 Huebner Rd.

San Antonio, Texas 78240

CONSENT FOR LABORATORY SPECIMEN COLLECTION

During your visit your provider may advise you to allow laboratory specimens to be collected (pap smear, culture, biopsy, blood work, etc.) in order to adequately diagnose and treat you. Your signature (patient and/or guardian) gives permission to Oak Hills Women's Center, P.A. to collect such specimens and send them to a laboratory for analysis. Please make sure at the end of your visit that you understand which specimens are being submitted to the lab on your behalf (pap smear, STD testing, bloodwork, etc.)

You may receive a bill from the laboratory. You are expected to know if your insurance has a "preferred laboratory" and to provide this information to this office upon check-in for your appointment. Unless otherwise specified, we will send specimens to LabCorp.

If you prefer for your specimens to be sent to a different lab, please indicate the name of the lab here:

You understand that Oak Hills Women's Center, P.A. and the laboratories are separate entities and therefore bill separately for services rendered. Oak Hills Women's Center, P.A. will not be held financially responsible for services billed by the laboratories.

Laboratories will generally bill your insurance first for services, and the patient will receive a bill for any balance not covered by the insurance. You are recommended to contact your insurance provider and/or the laboratory if questions or concerns arise regarding lab bills.

If you are a self-pay patient, you will receive a bill directly from the lab for its services. We urge you to contact the lab directly about any discounts that may be available to you.
